IN THE CLAIMS

Please amend the claims as indicated:

(currently amended) A method for receiving, on a [[user device]] <u>Personal Digital Assistant (PDA) having a limited sized display</u>, a web page content from a network content server, said method comprising:

requesting, from a user device and via a billing server at the PDA, a single web page's content from a network content server;

displaying, on the [[user device]] <u>PDA</u>, multiple options, from [[the]] <u>a</u> billing server to a single user of the [[user device to view]] <u>PDA</u>, for viewing the single web page's content for a price, wherein each option has a different price <u>based on how many advertising banners are</u> excluded from the single web page's content;

selecting, by the single user, at the [[user device]] \underline{PDA} at least one of the $\underline{multiple}$ options;

receiving, at the [[user device]] <u>PDA</u>, a requested content from the single web page according to the selected option, wherein the requested content is less than all of the single web page excludes advertising banners that are originally part of the single web page's content; and

optimizing usage of available space on the limited sized display of the PDA by displaying, on the [[user device]] PDA, only the requested content from the single web page.

- 2. (currently amended) The method of claim 1, wherein the prices of the options are based on a removal of advertisement from the single web page content wherein the requested content and a price to view the requested content are both varied by a single slider bar that is displayed on the limited sized display of the PDA.
- 3. (currently amended) The method of claim 1, wherein the prices of the options are <u>further</u> based on an age of [[the]] at least a portion of the single web page's content.
- 4. (currently amended) The method of claim [[1]] 2, wherein the requested_content is displayed on a Personal Digital Assistant (PDA) having a limited sized display slider bar allows

the single user to vary a cost of viewing the requested content based on an age and amount of the requested content being displayed on the PDA.

5. (cancelled)

- 6. (currently amended) The method of claim [[5]] 1, wherein an agreement to pay a fee causes [[thel] a display of only a non-text image from the single web [[page]] page's content.
- 7. (currently amended) A system for receiving, on a [[user device]] <u>Personal Digital Assistant (PDA) having a limited sized display</u>, a web page content from a network content server, said system comprising:

means for requesting, from a user device and via a billing server at the PDA, a single web page's content from a network content server;

means for displaying on the [[user device]] <u>PDA</u> multiple options, from [[the]] a billing server to a single user of the [[user device to view]] <u>PDA</u>, for viewing the single web page's content for a price, wherein each option has a different price <u>based on a time sensitivity of data in at least a portion of the single web page's content;</u>

means for selecting, by the single user, at the [[user device]] <u>PDA</u> at least one of the options;

means for receiving, at the [[user device]]PDA, a requested content from the single web page according to the selected option, wherein the requested content is less than all of the single web [[page]] page's content; and

means for displaying, on the [[user device]] <u>PDA</u>, the requested content from the single web page.

8. (currently amended) The system of claim 7, wherein the prices of the options are based on a removal of advertisement from the single web page content wherein the requested content and the price to view the requested content are varied by a slider bar that is displayed on the limited sized display of the PDA.

9. (cancelled)

10. (currently amended) The system of claim [[7]] 8, wherein the requested content is displayed on a Personal Digital Assistant (PDA) having a limited sized display slider bar allows the single user to vary a cost of viewing the requested content based on the age and amount of the requested content being displayed on the PDA.

11. (cancelled)

- 12. (currently amended) The system of claim [[11]] 7, wherein an agreement to pay a fee causes [[thel] a display of only a non-text image from the single web [[page]] page's content.
- 13. (currently amended) A computer program product, executed on a tangible computer-readable medium, for receiving, on a [[user device]] <u>Personal Digital Device (PDA) having a limited sized display, a web page content from a network content server, said computer program product comprising:</u>

computer program code for requesting, from a user device and via a billing server at the PDA, a single web page's content from a network content server;

computer program code for displaying, on the [[user device]] <u>PDA</u>, multiple options, from [[the]] <u>a</u> billing server to a single user of the [[user device to view]] <u>PDA</u>, for viewing the single web page's content for a price, wherein each option has a different price <u>based on how</u> many advertising banners are excluded from the single web page's content;

computer program code for selecting, by the single user, at the [[user device]] <u>PDA</u>, at least one of the options;

computer program code for receiving, at the [[user device]] <u>PDA</u>, a requested content from the single web page according to the selected option, wherein the requested content is less than all of the single-web-page excludes advertising banners that are originally part of the single web page's content; and

computer program code for displaying, on the [[user device]] <u>PDA</u>, the requested content from the single web page. 14. (currently amended) The computer program product of claim 13, wherein the prices of the options are based on a removal of advertisement from the single-web page content wherein the requested content and the price to view the requested content are varied by a slider bar that is displayed on the limited sized display of the PDA.

15. (currently amended) The computer program product of claim 13, wherein the prices of the options are further based on an age of the at least a portion of the single web page content.

16. (currently amended) The computer program product of claim [[13]] 12, wherein the requested content is displayed on a Personal Digital Assistant (PDA) having a limited sized display slider bar allows the single user to vary a cost of viewing the requested content based on an age and amount of the requested content being displayed on the PDA.

17. (cancelled)

18. (currently amended) The computer program product of claim [[17]] 13, wherein an agreement to pay a fee causes [[the]] a display of only a non-text image from the single web [[page]] page's content.

19. (currently amended) A method for transmitting web page content from a network content server to a [[user device]] <u>Personal Digital Assistant (PDA) having a limited sized display</u>, said method comprising:

receiving, at a billing server, a request from a [[user device]] <u>PDA</u> for a web page content from a network content server:

sending to the [[user device]] <u>PDA</u>, from the billing server, a display of multiple options for a single user to view the web page content for a price, wherein each option has a different price <u>that is based on how many advertising banners are excluded from the single web page's</u> content:

receiving, from a single user who is using the [[user device]] <u>PDA</u>, at least one selection from the multiple options; and

sending at least a portion of the web page content to the [[user device]] <u>PDA</u>, wherein the sent portion of the web page content is dependent on which option was selected by the user device, and wherein the sent portion excludes advertising banners that are originally part of the single web page's content.

20. (currently amended) The method of claim 19, wherein the prices of the options are based on a removal of advertisement from the single web page content wherein the requested content and the price to view the requested content are varied by a slider bar that is displayed on the limited sized display of the PDA.

21. (currently amended) The method of claim 19, wherein the prices of the options are further based on an age of the at least a portion of the single web page content.

22. (currently amended) The method of claim 19, wherein the multiple [[offers]] <u>options</u> are defined by a non-URL descriptive portion of a script header to the web page content.

23. (currently amended) The method of claim 22, wherein the script header contains eXtensible Markup Language (XML) script, and wherein the method further comprises using the XML script from the script header to generate at the user device a display of the multiple [[offers]] options.

24. (cancelled)

25. (original) The method of claim 19, wherein the network content server is on an Internet.

26. (original) The method of claim 19, wherein the billing server and the network content server are a same device.

27. (currently amended) A system for transmitting web page content from a network content server to a [[user device]] <u>Personal Digital Assistant (PDA) having a limited sized display, said method comprising:</u>

means for receiving, at a billing server, a request from a [[user device]] <u>PDA</u> for a web page content from a network content server:

means for sending, from the billing server to a single user of the user-device from the billing server PDA, a display of multiple options for viewing the web page content for a price, wherein each option has a different price that is based on how many advertising banners are excluded from the single web page's content:

means for receiving, from the [[user device]] <u>PDA</u>, at least one selection from the multiple options chosen by the single user; and

means for sending at least a portion of the web page content to the [[user device]] <u>PDA</u>, wherein the sent portion of the web page content is dependent on which option was selected by the user device, and wherein the sent portion excludes advertising banners that are originally part of the single web page's content.

- 28. (currently amended) The system of claim 27, wherein the prices of the options are based on a removal of advertisement from the single web page content wherein the requested content and the price to view the requested content are varied by a slider bar that is displayed on the limited sized display of the PDA.
- 29. (currently amended) The system of claim 27, wherein the prices of the options are further based on an age of the at least a portion of the single web page content.
- 30. (currently amended) The system of claim 27, wherein the multiple [[offers]] options are defined by a script header to the web page content.
- 31. (currently amended) The system of claim 30, wherein the script header contains eXtensible Markup Language (XML) script, and wherein the method further comprises parsing the XML script from the script header to generate at the user device a display of the multiple [[offers]] options.
- 32. (cancelled)

33. (original) The system of claim 27, wherein the network content server is on an Internet.

34. (original) The system of claim 27, wherein the billing server and the network content server are a same device.

35. (currently amended) A computer program product, executed on a tangible computerreadable medium, for transmitting web page content from a network content server to a [[user device]] <u>Personal Digital Assistant (PDA) having a limited sized display</u>, said computer program product comprising:

computer program code for receiving, at a billing server, a request from a [[user device]] PDA for a web page content from a network content server;

computer program code for sending, from the billing server to a single user of the PDA, user device from the billing-server a display of multiple options for viewing the web page content for a price, wherein each option has a different price that is based on how many advertising banners are excluded from the single web page's content;

computer program code for receiving, from the single user of the [[user device]] <u>PDA</u>, at least one selection from the multiple options; and

computer program code for sending at least a portion of the web page content to the [[user device]] <u>PDA</u>, wherein the sent portion of the web page content is dependent on which option was selected by the user device, and wherein the sent portion excludes advertising banners that are originally part of the single web page's content.

36. (currently amended) The computer program product of claim 35, wherein the prices of the options are based on a removal of advertisement from the single-web-page-content wherein the requested content and the price to view the requested content are varied by a slider bar that is displayed on the limited sized display of the PDA.

37. (currently amended) The computer program product of claim 35, wherein the prices of the options are further based on an age of the at least a portion of the single web page content.

38. (currently amended) The computer program product of claim 35, wherein the multiple [[offers]] options are defined by a script header to the web page content.

39. (currently amended) The computer program product of claim 38, wherein the script header contains eXtensible Markup Language (XML) script, and wherein the method further comprises parsing the XML script from the script header to generate at the user device a display of the multiple [[offers]] options.

40. (cancelled)

41. (original) The computer program product of claim 35, wherein the network content server is on an Internet.

42. (original) The computer program product of claim 35, wherein the billing server and the network content server are a same device.
